

PCN – Product Change Notice

PCN #: WE080710FE375

Date: July 11, 2008

RE: PFC FrontEnd

To Our Valued Customers

We appreciate your use of Westcor's PFC FrontEnd. This notice is to inform you of a change in product performance

PCN Type:

Notice of a change in product performance

Product(s) Affected:

PFC FrontEnd

Proposed Change:

The nominal output voltage of the unit will change from 375V (+/- 3%) to 384V (+/-3%) .

Reason(s) for the Change:

This will align the output voltage to match up exactly with the 384V input BCM product line

Customer impact:

Better performance with the 384V series BCM. No impact with existing compatible VI/VE, V375 series modules, compatible MegaMods or ViPAC Arrays

Product Traceability and Transition dates

Model # FE375 will be discontinued and replaced with FE375-1. This will be effective for all new orders placed after July 15, 2008

Effective date of change:

July 15, 2008
